

Rukla, 24 March 2020

Although we have taken extensive precautions in our base, we have a few COVID-19 cases. They are being well taken care of and placed in quarantine. Last night we have evacuated one sick Dutch soldier and four soldiers with similar symptoms. We have done so, in order not to burden the Lithuanian health system. At this moment we are testing more soldiers to get a better grip on the spreading of the virus and in order to separate them from each other until everybody is recovered.

In the meantime, we are upholding our mission and conducting reduced trainings in order to maintain our readiness.

#WEARENATO

Together ! Strong !
